Products Features

Built-in Haiwell Cloud Configuration

Haiwell Cloud Configuration Software makes it easier for devices to access the cloud, unlimited variables number.

Capacitive touch screen

supports wet hand operation, sensitive touch, instant response with a light touch of fingertips. High brightness, perfect restoration of image color and clarity.

Video surveillance

HMI can connect with camera supporting RTSP or EZVIZ protocol by Ethernet. The camera can be watched on HMI and APP.

Video playing

You can play video on HMI. The supported format is MP4.

Data security

The user data is not stored in Haiwell cloud. All the data can be stored in private or public server assigned by users.

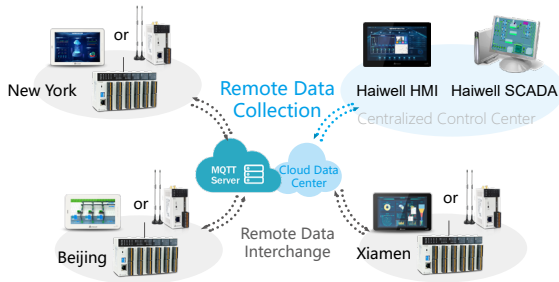

Web API

Users can get the data and control device on their own platform or software by Web API in local area network or over Internet.

Remote centralized control

All the data of remote devices can be acquired through MQTT broker for centralized control. Users don't even need to deploy server if using cloud data center.

IoT platform

All models support the connection to Alibaba Cloud IoT, AWS IoT and Google Cloud IoT Core.

MQTT protocol

MQTT protocol is supported and applied to the connection with ERP/MES/database.

Text to speech

The english text can be converted into voice . Audio files can also be played.

Voice intercom

All models support voice intercom, voice broadcast and remote intercom with APP.

Support text to speech

Support voice broadcast

Support voice intercom

usb to audio adapter

Support remote intercom and broadcast with mobile phone

Display integration

The display of HMI can be embedded in other applications such as software, website, APP and etc so that they have remote access to HMI.

Mobile scanner

You can turn your mobile phone into a barcode scanner and enter information everywhere. It's more convenient than external scanner.

Digital display board

The production data, device state and video surveillance can be viewed on large screen by connecting with TVBOX. It can be applied to data visualization and centralized control.

Mobile authentication

The identity of operator can be verified by using NFC recognition or scanning a QR code with mobile phone.

Secure access

The remote access needs to be identified by the A/B key security mechanism. The remote control can be configured to be authorized on HMI.

RFID/NFC

HMI supports reading RFID tags and NFC recognition, which can be applied to user login and access control.

Cloud maintenance

It's easier for manufacturers to manage equipments by using remote maintenance function.

Connection in LAN

All models have built-in IIoT technology which enables local access and open interface without internet.

Remote access

With the real-time control solution developed by Haiwell, concurrent users can remotely access HMI by APP and desktop.
